DESCRIPTION

APIX PR03 CL linear print and apply machine is a professional labeller for printing and applying of selfadhesive labels. Available in the right or left version.

A technologically advanced product designed to quickly print and apply labels with alphanumeric data, barcodes, symbols, logos on moving products.

The main feature is the integration of TSC industrial printing group - PEX 1220 model to the Collamat applicator.

The programmable console facilitates the setting of data and printer set-up parameters. It can have several communication interfaces.
